MI Heating Cable – Typical Pavers on Concrete Detail

Cables to be fastened to stainless steel strapping

Cables to be entirely embedded with .5"- 1" of mortar or thinset topping

Heated lengths of cables must be completely embedded in mortar, thinset, or concrete; exposure of heating cable will lead to cable burn outs, faults, and physical damage

All railing locations (if applicable) to be marked out prior to cable installation

TRM Brand MI cables to be utilized

Cable Designs and parameters to be determined based on specification and area dimensions
