

KEY FEATURES

- ✓ FULL PROGRAMMABILITY.
- ✓ 120 VOLT AND 240 VOLT DUAL VOLTAGE.
- ✓ 15 AMP CAPACITY.
- ✓ FLOOR SENSOR (15 FEET) INCLUDED.
- ✓ COMPLETE WITH GFCI PROTECTION.

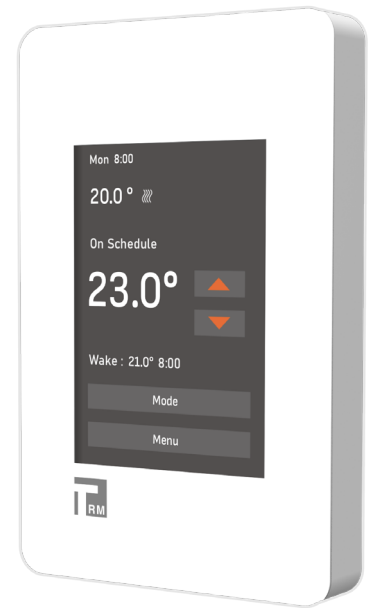

DESCRIPTION

The Silver Thermostat is compatible with most floor heating sensors, and suitable for diverse floor types: tile, stone, laminate, concrete, and wood. Designed for high reliability and streamlined installation, the Silver Thermostat elevates your heating experience.

Our thermostat empowers you with precise control over your floor heating system. It operates on a flexible weekly program, offering 4 or 2 stages per day, 7 days a week. While the default

settings work for most, you have the freedom to tailor the program to your needs. To save energy when no one's home, simply lower the temperature set-point.

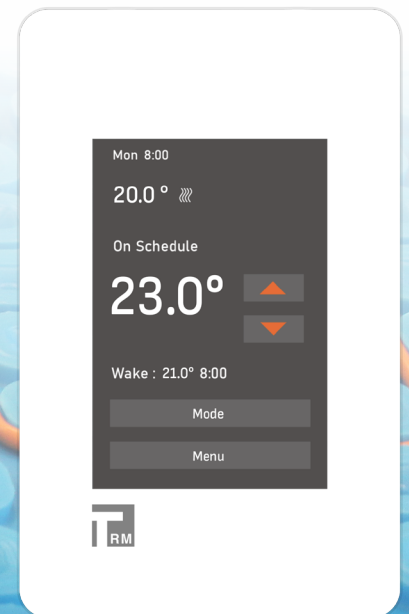

Additionally, our thermostat features a built-in adaptive function. When activated, it proactively adjusts heating to reach the desired temperature for the next stage. Keep in mind that the Adaptive function requires a brief learning period for optimal performance, ensuring your comfort and efficiency.

TECHNICAL SPECIFICATIONS

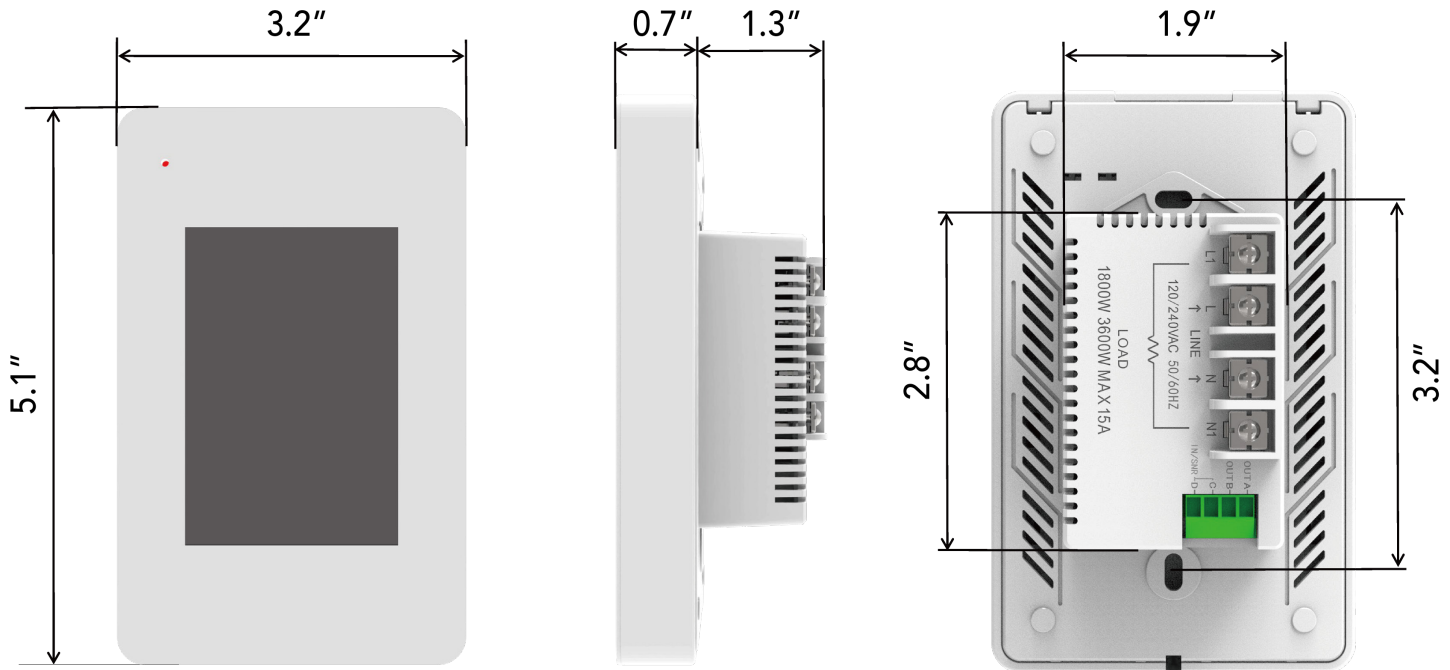

Supply Voltage	120V/208V/240V 50/60 Hz
Load	Max.15 A (resistive load)
GFCI	Class A (5 mA trip level)
Setpoint Range	+5 to +40°C / +41 to +104°F
Temperature Range	+5 to +45°C / +41 to +113°F
Temp Tolerance	Default 1°C /2°F

Floor sensor included.
